Energy Transfer — Practice

Chapter 4 · Energy Transfer · Weeks 4–5

Name: _____ Date: _____

A. FIND THE SOURCE AND TARGET

For each example, write the SOURCE (where energy starts) and the TARGET (what changes).

Example	Source	Target
bell rings → paper moves		
flashlight → card lights up		
warm water → spoon warms		
battery → bulb glows		

B. WHAT IS THE EVIDENCE?

1. What is the evidence that energy transferred in ONE of the examples above?

2. Do we see energy itself, or do we see a change? Explain.

C. TRANSFER / TRANSFORMATION / BOTH

TRANSFER = energy moves. TRANSFORMATION = energy changes form. BOTH = moves AND changes form.

Sort each system. Circle one.

System	TRANSFER / TRANSFORMATION / BOTH
Flashlight	TRANSFER TRANSFORMATION BOTH
Buzzer	TRANSFER TRANSFORMATION BOTH
Warm water warms a spoon	TRANSFER TRANSFORMATION BOTH
Motor	TRANSFER TRANSFORMATION BOTH

D. FIX THE EXPLANATION

This statement is wrong. Fix it:

"Energy disappeared when the buzzer made sound."

Your fix:

E. SHORT EXPLAIN

Choose one example. How does it provide evidence that energy transferred? Name the source, the change, and why the change is evidence.
