# Interactive Science Notebook — Chapter 4 · Energy Transfer

*Trim each insert on the dashed line and glue into your notebook. Every interactive part has a flat, low-motor alternative.*

**INSERT 1 — What Is Energy Transfer? · trim on the dashed line · glue the BACK**

## What Is Energy Transfer?

*Chapter 4 · Week 4*

### VOCABULARY

Energy transfer happens when energy moves from one _____ or _____ to another.

### MODEL

**SOURCE → ENERGY MOVES → TARGET**

### DRAW

Draw ONE example of energy transfer. Label the source and the target.

*[ draw your example here ]*

**INSERT 2 — Sound + Light Transfer · trim on the dashed line · glue the BACK**

## Sound + Light Transfer

*Chapter 4 · Week 4*

### SOUND

*source → transfer → observed change*

Draw the sound setup and the change you saw:

*[ draw here ]*

### LIGHT

*source → transfer → observed change*

Draw the light path and the change you saw:

*[ draw here ]*

**INSERT 3 — Heat + Electricity Transfer · trim on the dashed line · glue the BACK**

## Heat + Electricity Transfer

*Chapter 4 · Week 5*

### HEAT

*warmer → energy transfer → cooler*

**Evidence I observed:**

The temperature changed: _____

### ELECTRICITY

*battery → circuit → device*

**Evidence I observed:**

The device changed: (light / sound / motion) _____

**INSERT 4 — Transfer vs. Transformation · trim on the dashed line · cut out the bottom cards and sort them under the flaps · flat option: draw a line from each system to its column**

## Transfer vs. Transformation

*Chapter 4 · Week 5 · lift the flap to check*

### THE THREE IDEAS

**TRANSFER — energy moves.**
**TRANSFORMATION — energy changes form.**
**BOTH — energy moves AND changes form.**

### SORT THE SYSTEMS

Sort each system into TRANSFER, TRANSFORMATION, or BOTH. (BOTH is allowed — do not force either/or.)

| TRANSFER | TRANSFORMATION | BOTH |
|---|---|---|
| | | |

*Systems to sort: flashlight · buzzer · motor · warm water warms a spoon · sound source (cup + paper)*

**INSERT 5 — Evidence + CER · trim on the dashed line · glue the BACK**

## Evidence + CER

*Chapter 4 · Week 5*

### FOUR STEPS

**NOTICE — what did I observe?**
**EVIDENCE — what changed?**
**EXPLAIN — why did it change?**
**CONNECT — how does this show energy transfer?**

### CER PLANNING BOX

Claim: I know _____

because _____

Evidence (the change I observed): _____

Reasoning (how the change shows transfer): _____
