Practice — Energy Causes Change

Chapter 1 · Grade 4 · PRACTICE — NOT GRADED

Name: _____ **Homeroom:** ○ 4A ○ 4B ○ 4C ○ 4D

A WHAT CHANGED?

Write the change you could observe and one form of energy.

SCENARIO	WHAT CHANGED?	FORM OF ENERGY
A light switch is flipped.		
A toy car is pushed.		
A bell is rung.		
An ice cube sits on a warm hand.		

B EVIDENCE OR NOT ENOUGH EVIDENCE?

Circle one. Then finish the sentence: "Because …"

OBSERVATION	CIRCLE ONE	BECAUSE …
The fan blades started spinning when we plugged it in.	**EVIDENCE** **NOT ENOUGH**	
The battery looks shiny.	**EVIDENCE** **NOT ENOUGH**	
The room got brighter when the light came on.	**EVIDENCE** **NOT ENOUGH**	
I think the motor is strong.	**EVIDENCE** **NOT ENOUGH**	

C STORED ENERGY

Circle YES or NO. Then tell what change could happen later — or say if it is happening now.

EXAMPLE	STORED ENERGY?	CHANGE LATER — OR HAPPENING NOW?
a battery in a flashlight that is switched off	YES NO	
an apple held above the ground	YES NO	
a stretched rubber band	YES NO	
a toy car rolling across the floor	YES NO	

D EXPLAIN

Energy is the ability to cause change. Describe one change you have observed. Tell why that change is evidence of energy.
