Practice — Moving Objects Have Energy

Chapter 2 · Grade 4

Name: _____ Date: _____

A. What is moving?

Circle or write the object that is in motion.

Scenario	Object in motion
A basketball falls through the hoop.	
A marble rolls toward another marble.	
Wind spins a turbine blade.	
A shopping cart bumps a box.	

B. What changed?

For each, write the change the moving object caused.

Scenario	Change caused
The basketball hits the net.	
The marble hits the target marble.	
Wind spins the blades.	
The cart bumps the box.	

C. Evidence

Circle YES or NO — is it evidence that the moving object had energy?

Observation	Evidence?
The target marble changed position.	YES / NO
The marble is round.	YES / NO
The block slid forward after the ball hit it.	YES / NO

I think the ball is heavy.	YES / NO

D. Before / After

Draw one example of a moving object causing a change.

BEFORE	AFTER

E. Explain

How can a moving object show evidence of energy?
