Energy Resource Innovations

Chapter 9 Unit 2 Guided Notes · Grade 4 Using Natural Resources for Energy

Name: _____ **Date:** _____

BIG QUESTION **What other energy resources are being developed?**

KEY WORDS

biofuel — a fuel made from the remains of _____ living organisms.

hybrid — a vehicle that uses _____ different sources of fuel.

NEW IDEAS

INNOVATION	WHAT IT DOES
biofuels (ethanol)	_____
electric and hybrid cars	_____
fuel cells (hydrogen)	_____
wave energy	_____
sidewalk tiles and clothing that make electricity	_____

CHECK YOUR THINKING

Pick one innovation. What problem does it help solve?

Engineering Better Systems

Name: _____ **Date:** _____

HOW ENGINEERS IMPROVE SYSTEMS

Engineers work to make energy systems better: more efficient, less wasteful, and safer.

Regenerative braking turns a car's energy of motion into _____ .

Better solar cells convert _____ of the sunlight that strikes them.

DRAW / LABEL

Design your own energy idea. Draw it and label the parts.

draw your energy innovation here

CHECK YOUR THINKING

Why do engineers keep testing and improving energy ideas?

CONNECT *Chapter 9 connection: engineering is how we find new, better ways to meet energy needs.*
