Chapter 3 · Energy and Speed Are Related

Practice · not graded · OPTIONAL

Name _____ Date _____

Use one ball in every part. Do not write a speed number.

1. A student rolls the same ball down a low ramp and a steeper ramp. The cup moves farther from the steeper ramp. What is the evidence that the ball had more energy of motion?

_____

_____

2. This chapter compares one ball at two speeds. Why would a different ball change the test?

_____

_____

3. Name one thing you measured in centimeters. Then name the two setups you compared to see which gave the same ball more energy of motion.

Measured: _____

Compared: _____
