Transfer / Transformation / BOTH

Sort the cards · Unit 1 Wk 3 · cut along the lines

Name: _____ **Date:** _____

TRANSFER	TRANSFORMATION	BOTH
energy moves to a new place/object	*energy changes form*	*energy moves AND changes form*

CARDS — CUT OUT (15)

1. A ball rolls and hits another ball, which starts moving.
2. A toaster turns electrical energy into heat and light.
3. Sunlight warms your skin.
4. A battery powers a flashlight, and light shines on the wall.
5. You shout, and a friend across the room hears you.
6. A wind turbine spins and a generator makes electricity.
7. A pot on a stove gets hot, and the handle warms too.
8. A car engine burns fuel to make the car move.
9. A solar panel turns sunlight into electricity that powers a fan.
10. A candle burns and lights the room.
11. A cup of warm water warms a cooler spoon placed in it.
12. A hair dryer turns electric current into heat and moving air.
13. A stretched rubber band is let go and flies across the room.
14. A loud speaker makes sound you can hear across the room.
15. A hand pushes a swing, and the swing moves.

TEACHER KEY

TRANSFER: cards 1, 3, 5, 7, 11, 14, 15

TRANSFORMATION: cards 2, 6, 8, 12

BOTH: cards 4, 9, 10, 13

Transfer = energy moving place-to-place or object-to-object (form stays the same).

Transformation = energy changing form (motion → light, stored → motion).

Both = the system changes form AND the energy then travels.

Accept reasoned placements; discuss edges (a speaker = sound transfer after the transformation inside the speaker).
