Grade 4 Science — ANSWER KEY

Unit 1 Assessment — Energy Transfer & Transformation

Teacher only. 25 questions × 2 points = 50 points.

Part 1: Matching — Answer Key

1. Energy Transfer → F. Energy moving from one place or object to another.

2. Stored Energy → I. Energy that can cause a change at a later time.

3. Speed → E. A measurement of the distance an object travels over an amount of time.

4. Collision → G. When two objects come together with impact.

5. Energy of Motion → J. The energy an object has while it is moving.

6. Criteria → H. The things a good design must do or have.

7. Energy Transformation → C. Energy changing from one form to another form.

8. Energy → B. The ability to cause change.

Part 2: Multiple Choice — Answer Key

9. C. Cause a change

10. A. The high ramp, because the ball moves faster at the bottom

11. D. It can cause a change later, when the flashlight is turned on

12. B. Energy of motion transferred from the car to the target

13. C. Energy transfer

14. B. A light bulb changing electrical energy into light

15. A. Constraint

16. D. We observe the changes and use them as evidence

17. B. A flashlight lighting a card across the room

18. C. A stretched rubber band ready to snap

19. A. When it is moving fast

20. D. Both transfer and transformation

21. B. The ball had more energy of motion when it moved faster from the higher ramp

22. A. Use the test result as information to improve the design and test again

23. C. Energy of motion transferred from the moving marble to the still marble

24. D. Edison improved earlier light bulb designs and tested many materials

25. A. Energy transferred from the warm water to the cooler cup
