Absent-Student Recovery — Moving Objects Have Energy

Chapter 2 · Grade 4 · Use with the Reader · Not a classmate report

Name: _____ **Homeroom:** ○ 4A ○ 4B ○ 4C ○ 4D

A moving object has energy of motion because it can cause a change. The change is the evidence.

Read printed pages 7–12. Then answer.

1. What is motion?

_____

_____

2. What is energy of motion?

_____

_____

3. Marble demonstration. One marble rolls into a still marble.

BEFORE	AFTER

What changed?

_____

_____

4. How do we know the moving marble had energy? Start with "We know because…"

_____

_____

5. Name the change caused by a swinging hammer, a swinging pendulum, or the wind.

6. A ball does not start its own motion. It is put into motion by outside motion. What change can that moving ball cause?

7. Pick the wind or a swinging pendulum. What useful change does it cause?
