Chapter 2 · Moving Objects Have Energy

GUIDED NOTES

Name: _____ **Homeroom:** ○ 4A ○ 4B ○ 4C ○ 4D

BQ How are energy, change, and movement of objects related?

My first thinking

V1 VOCABULARY – MOTION

Reader p. 7

motion – the process of an object changing _____ .

N1 MOVING OBJECTS CAN CAUSE CHANGES

Reader p. 8

A moving object can cause a _____ .

Players cause their own motion. A ball does not. Something else puts the ball into motion.

Some objects cause their own motion. Other objects are put into motion by _____ motion.

V2 VOCABULARY – ENERGY OF MOTION

Reader p. 9

energy of motion – the energy an object possesses while it is _____ .

N2 MOVING OBJECTS HAVE ENERGY

Reader p. 9

All moving objects have energy of _____ .

Energy is the ability to cause change. A moving object causes change, so it has energy.

MOVING OBJECT → **CHANGE** → **EVIDENCE**

OBSERVE Marble collision – one moving marble rolls into a target marble.

BEFORE	AFTER

What changed?

_____

_____

N3 PEOPLE USE THE ENERGY OF MOTION

Reader pp. 10–12

Write or draw the change each moving object causes.

MOVING OBJECT	WHAT CHANGE DOES IT CAUSE?
hammer (swinging)	
pendulum (swinging)	
wind (moving air)	

CHECK YOUR THINKING

How do we know a moving object has energy?

Start with: "We know because the moving object causes …"

BQ · NOW I THINK How are energy, change, and movement of objects related?
