UNIT 1 · TEACHER PLAYBOOK

Energy Transfer & Transformation

Grade 4 · CKSci-aligned · Teacher Edition

TEACHER PLAYBOOK

SCOPE Chapters 1–2 are classroom-ready: guided notes, slideshow, practice/application, chapter quiz, absent-student recovery and FLEX options are included for each. Chapters 3–7 spreads and special sections are placeholders in this edition.

AUTHORITY Authoritative curriculum = CKSci Student Reader + Teacher Guide. This playbook documents the final system; it does not drive curriculum decisions.

UNIT AT A GLANCE

FIELD	DETAIL
Unit title	Energy Transfer & Transformation (Grade 4)
Chapters	1 Energy Causes Change · 2 Moving Objects Have Energy · 3 Energy and Speed Are Related · 4 Energy Transfer · 5 Collisions Transfer Energy · 6 How Can Energy Transformations Solve Problems? · 7 Solving Problems and Designing Solutions: Thomas A. Edison
Unit Big Idea	Energy can be transferred (moved) and transformed (changed in form). Both produce observable changes that are evidence of energy.
Transfer vs transformation	Transfer = energy moves (place/object). Transformation = energy changes form. BOTH is valid — never force either/or.
Major vocabulary	14 Core Vocabulary terms (see Unit Vocabulary Map): change, energy, stored energy, motion, energy of motion, speed, energy transfer, collide, collision, sound, convert, conversion, energy transformation, engineering design.
Flagship lab	Ramp It Up 2.0 (Ch3 · 2-day quantitative investigation)
Required build	Pom-Pom Launcher (end of unit · formative)
Assessment	Unit 1 final = 25 questions / 50 points (matching Q1–8 · multiple choice Q9–25) + separate teacher key.
Duration	Weeks 1–4 (16 core blocks, 30-min each) + Friday FLEX
Primary student resources	Guided Notes (primary) · Science Journal (secondary) · practice/application · labs · study guide · review game

DATED PACING CALENDAR — WEEKS 1–4

30-minute blocks · M–Th core + Friday FLEX. Chapter 1 follows the Chapter 1 Pacing Plan (Mon · Tue · Fri). Chapter 2 follows the Chapter 2 Pacing Plan (Wed · Thu). Rows for Chapters 3–7 keep their own block labels until their own phases.

WEEK 1 · 10/12–10/16 · Chapters 1–2

DAY	CHAPTER / ACTIVITY	READER	GUIDED NOTES	DEMO / ACTIVITY	COLLECT / GRADE
Mon 10/12	Ch1 Session 1 — Observe & Name (24.5 min)	1–2	Notes p. 1: BQ · V1 · N1	Sharpener DEMO	notes (not graded)
Tue 10/13	Ch1 Session 2 — Forms & Stored Energy (24.5 min)	3–5	Notes p. 2: N2 · V2 · N3	Rubber-band stretch (optional)	notes (not graded)
Wed 10/14	Ch2 Session 1 — Motion and Cause (24 min)	7–9	Notes p. 1: BQ · V1 · N1, then V2	Marble Collision DEMO	notes (not graded)
Thu 10/15	Ch2 Session 2 — Energy of Motion, Use & Quiz (24 min)	9–12	Notes p. 2–3: N2 · N3 · CHECK · BQ now	Chapter 2 quiz (8 items, in hands at minute 12)	QUIZ — GRADED (12 pts)
Fri 10/16	Ch1 Session 3 — Recognize, Reflect & QUIZ (25 min) · FLEX-day consolidation, no new vocabulary	1–5	Notes p. 3: N4 · CHECK · BQ now	Chapter 1 quiz (9 items)	QUIZ — GRADED (16 pts)

WEEK 2 · 10/19–10/23 · Chapter 3 + Ramp It Up 2.0

DAY	CHAPTER / ACTIVITY	READER	GUIDED NOTES	DEMO / ACTIVITY	COLLECT / GRADE
Mon 10/19	Ch3 placeholder – speed relationship	13–14	Key words · same-object speed	Ramp + Target Preview DEMO	exit ticket
Tue 10/20	Ramp It Up 2.0 – Day 1	13–14	Data table (lab)	LAB: calibration · 3 heights × 3 trials · cm	lab sheet (formative)
Wed 10/21	Ramp It Up 2.0 – Day 2	13–14	Graph: Ramp Height vs Avg Cup Displacement	LAB: averages · graph · Design-Your-Ramp	lab + graph (formative)
Thu 10/22	Ch3 synthesis	15–16	Conclusion · Fair Test	evidence-based conclusion	exit ticket
Fri 10/23	FLEX	–	–	Drop It (FLEX) · graph/data practice	not graded

WEEK 3 · 10/26–10/30 · Chapters 4–5

DAY	CHAPTER / ACTIVITY	READER	GUIDED NOTES	DEMO / ACTIVITY	COLLECT / GRADE
Mon 10/26	Ch4 Block 1 – Sound + Light	17–22	Key Words · Source→Path→Receiver	Balloon Drum / salt DEMO	exit ticket
Tue 10/27	Ch4 Block 2 – Heat + Electricity	23–24	Source→Path→Receiver organizer	Source→Path→Receiver organizer (ACTIVITY)	organizer (formative)
Wed 10/28	Ch5 Block 1	25–27	Key Words · Before/After	Toy-Car Collision DEMO	exit ticket
Thu 10/29	Ch5 Block 2	28–30	Before/After diagram · Scenarios	collision scenarios (ACTIVITY)	application (formative)
Fri 10/30	FLEX	–	–	Newton's cradle	not graded

DAY	CHAPTER / ACTIVITY	READER	GUIDED NOTES	DEMO / ACTIVITY	COLLECT / GRADE
				demo (teacher) · collision predictor	

WEEK 4 · 11/2–11/6 · Chapters 6–7 + Pom-Pom + review + assessment

DAY	CHAPTER / ACTIVITY	READER	GUIDED NOTES	DEMO / ACTIVITY	COLLECT / GRADE
Mon 11/2	Ch6 Block 1 — Transformations	31–33	Key Words · Input→Output model	Wind-Up Timer DEMO	exit ticket
Tue 11/3	Ch6 Block 2 — Engineering Design	34–36	Engineering cycle · criteria/constraints	T/T/BOTH sort (ACTIVITY)	exit ticket
Wed 11/4	Ch7 — Edison / Unit Synthesis	37–42	Unit Concept Map	Flashlight DEMO	exit ticket
Thu 11/5	Pom-Pom Launcher (REQUIRED BUILD) + review	—	—	build + test/improve · study guide	build (formative)
Fri 11/6	Review + Unit 1 assessment	—	—	review game · 25Q/50pt written final	GRADED (25 Q / 50 pts)

PACING FLAG Week 4 compresses Ch6 (2 blocks) + Ch7 (1 block) + Pom-Pom build + review + assessment into 5 days. Feasible only with the compact in-unit engineering cycle (RD-4) and a streamlined review. The 25Q/50pt final is ~30–45 min and may split Thu/Fri. See the Unit 1 Pacing Calendar.

HOW TO USE THIS UNIT

ELEMENT	WHAT TO KNOW
Blocks	30-minute science blocks · M–Th core + Friday FLEX. No essential new core content on Friday.
Primary artifact	Guided Notes are PRIMARY · Science Journal is SECONDARY. Design notes first, then slides.
BQ/V/N mirror	Slides' Big Question / Vocabulary / Notes anchors mirror the student notes exactly.
Status vocabulary	AVAILABLE = exists · PLANNED = scheduled, not built (do NOT treat as a filename) · NOT REQUIRED · OPTIONAL/FLEX.
Friday FLEX	RECOVER (catch-up/absent) · PRACTICE (skill) · EXTEND (enrichment). Never blocks Monday.
Transfer vs transformation	Transfer = energy moves · transformation = energy changes form · BOTH is valid — never force either/or.
Same-object rule	Speed–energy comparisons always use the SAME object at different speeds.

READ FIRST Front matter (At a Glance → Pacing → Resource Map → Grading → Materials → Vocabulary → Demo Map) gives the whole unit. Chapter spreads give the day-by-day. Start with the Pacing Calendar.

HOW SLIDES + GUIDED NOTES WORK

RULE	WHAT IT MEANS
Notes-first	Guided Notes are designed BEFORE the matching slideshow. Notes are the primary student reference.
Exact mirror (BQ/V/N)	Every NOTES-mode slide matches the paper exactly – same section label, wording, bullets, blanks, order, diagram.
Scope of mirror	Mirror applies to NOTES-mode slides only. Not every blank needs a cue slide. Hooks/review MCQ are DEMO/DISCUSSION.
Reveal discipline	Fill-in answers are revealed, not front-loaded (prediction-before-reveal).
Vocabulary TEACH vs RECORD	TEACH = full-screen card (word + visual + exact source def + Reader page). RECORD = fill-in from memory, card covered.
9-step choreography	BIG QUESTION → PHENOMENON → VOCAB CARDS → VOCAB NOTES → READ → CHECKS → CONCEPT NOTES → APPLICATION → RETURN TO BQ
Mode badges	BQ · D (demo) · V (vocab) · R (read) · C (check) · N (notes) · W (write) · T (talk) · P (practice) · J (journal).
Notes navigation (permanent)	BQ / V1 / V2 / N1 / N2 / N3 / N4 – distinct from temporary HUD action bubbles.

STATUS Chapter 1 Guided Notes and slideshow are FINAL. Chapter 2 is a Phase 7.3 remediation candidate and is not frozen. Chapters 3–7 notes and slide decks are still placeholders.

RESOURCE MAP

RESOURCE	AUDIENCE	REQUIRED	GRADED	STATUS	TEACHER KEY
Guided Notes (Ch1–7)	Student	CORE	No (formative)	Ch1 FINAL · Ch2 candidate · Ch3–7 PLANNED	Ch1 AVAILABLE · Ch2 candidate · Ch3–7 PLANNED

Absent recovery	Student/Teacher	CORE support	No	AVAILABLE	—
Media	Teacher	OPTIONAL/FLEX	—	PARTIAL (Ch1–2 staged · Ch3–7 scripts)	—

Full matrix: Unit 1 Resource Map

ASSESSMENT & GRADING PLAN

Unit 1 final (locked)

ATTRIBUTE	SPECIFICATION
Questions / points	25 questions · 50 points · 2 points each
Q1–8	Matching (8 terms, 11 definitions, 3 extras)
Q9–25	Multiple choice (4 options each)
Excluded	No short answer · no CER · no fill-in-the-blank
Key	Separate teacher key (never mixed into student pages)
Balance (by points)	Core 26% · data/diagram 30% · application 26% · engineering 18%

Routine scoring convention

> **SCORE** Score: _____ / [raw max] _____ % — All scored work is reported as raw score + percentage (out of 100).

Weighing

Teacher grading-weight policy: not specified by Unit materials. No assignment weights are invented here.

MASTER MATERIALS LIST

CATEGORY	ITEMS
Reusable classroom	Plastic ramp (or ruler + books) · toy car · plastic target cup · identical glass marbles · meter stick/ruler · shallow sand tray · thermometer · low-voltage battery circuit (LED/bulb/buzzer/motor) · flashlight · stopwatch/timer
Consumables	Index cards (vocab deck) · masking tape · craft kit (string, bells, cups, cardboard, rubber bands — latex-free) · warm water (heat demo) · sand
Chapter demos	Electric pencil sharpener + pencil (Ch1) · two identical marbles (Ch2) · ramp + marble + cup (Ch3) · cup/balloon/salt + flashlight + warm water + thermometer + AA/AAA circuit (Ch4) · toy car + cup (Ch5) · wind-up timer (Ch6) · flashlight (Ch7)
Ramp It Up 2.0	Standardized track (28×6 in, 1-in rails) · 3 identical books · same marble · lightweight target cup · printed 0–50 cm strip · ruler + tape · role cards (Launcher / Target Manager / Measurer / Recorder)
Pom-Pom Launcher	Craft kit: cardboard tube, rubber bands (latex-free option), pom-poms, tape · safety note: pieces to adult if band breaks
Optional / FLEX	Newton's cradle (teacher demo only) · solar cell (optional) · Energy Detectives scavenger hunt items · Drop It supplies

No specialty equipment invented beyond the locked demo/build requirements. Quantities scale by group count (class size is an open question).

UNIT VOCABULARY MAP (14 CORE VOCABULARY)

TERM	CH	READER P.	V-GROUP	NOTES STATUS	ASSESSMENT ELIGIBILITY	COMMON MISCONCEPTION
change	1	1	Ch1	Notes fill-in (Key Words)	Eligible (matching/MC)	–
energy	1	1	Ch1	Notes fill-in (Key Words)	Eligible (matching/MC)	"Energy is a visible substance"
stored energy	1	4	Ch1	Notes fill-in (Key Words)	Eligible (matching/MC)	"Stored means moving now" / "only moving objects have energy"
motion	2	7	Ch2	Notes fill-in	Eligible (matching/MC)	motion (process) ≠ energy of motion (possession)
energy of motion	2	9	Ch2	Notes fill-in	Eligible (matching/MC)	"faster always = more energy" (must be SAME object)
speed	3	13	Ch3	Notes fill-in	Eligible (matching/MC)	"ramp height = speed" (speed is inferred)
energy transfer	4	17	Ch4	Notes fill-in	Eligible (matching/MC)	"transfer = transformation" · "energy disappears"
collide	5	25	Ch5	Notes fill-in	Eligible (matching/MC)	"energy disappears after collision"
collision	5	25	Ch5	Notes fill-in	Eligible (matching/MC)	same as collide
sound	5	28	Ch5 (L10)	Notes fill-in	Eligible	"sound is

TERM	CH	READER P.	V-GROUP	NOTES STATUS	ASSESSMENT ELIGIBILITY	COMMON MISCONCEPTION
					(matching/MC)	matter moving"
convert	6	32	Ch6	Notes fill-in	Eligible (matching/MC)	transfer vs transformation
conversion	6	32	Ch6	Notes fill-in	Eligible (matching/MC)	transfer vs transformation
energy transformation	6	32	Ch6	Notes fill-in	Eligible (matching/MC)	transfer vs transformation
engineering design	6	36	Ch6	Notes fill-in	Eligible (matching/MC)	"biggest/ loudest = best"

NOT REQUIRED Kinetic · potential · gravitational potential · mechanical · radiant · momentum · inertia · compression wave are NOT introduced as required (TG explicitly avoids them).

DEMO / ACTIVITY / LAB / BUILD MAP

CHAPTER	EXPERIENCE	CATEGORY
Ch1	Electric Pencil Sharpener	DEMO
Ch2	Marble Collision	DEMO
Ch3	Ramp + Target Preview	DEMO
Ch3	Ramp It Up 2.0 (Day 1 + Day 2)	LAB / INVESTIGATION
Ch4	Balloon Drum / salt (sound transfer)	DEMO
Ch4	Source → Path → Receiver → Evidence	ACTIVITY
Ch5	Toy-Car Collision	DEMO
Ch5	Collision application / before-after models	ACTIVITY
Ch6	Wind-Up Timer	DEMO
Ch6	Transfer / Transformation / Both sort	ACTIVITY
Ch7	Flashlight	DEMO
End of unit	Pom-Pom Launcher	REQUIRED BUILD
Post-assessment	Open-ended engineering challenge	POST-TEST STEM
–	Energy Detectives · Moving Marbles · Drop It	OPTIONAL / FLEX

CHAPTER TEACHER SPREAD — TEMPLATE (BLANK)

Reusable two-page spread. LEFT = Teach It · RIGHT = Teacher Support. Populate in place; do not overfill.

CHAPTER 1 — TEACHER SPREAD

CHAPTER 1 · ENERGY CAUSES CHANGE

LEFT PAGE — TEACH IT

FIELD	CONTENT
Big Question	Where can we observe evidence of energy causing change? (TG L2 "forms" question → N2)
Reader pages	Printed pp. 1–6 (PDF 7–12) · core pp. 1–5 · p. 6 = forward preview
Approximate time	3 sessions: Mon 24.5 · Tue 24.5 · Fri 25 min (incl. 13-min quiz). Authority: Chapter 1 Pacing Plan
Student resources	Guided Notes (3 pp, FINAL) · quiz (9 items, 16 pts) · practice (ungraded) · Energy Detectives (optional, ungraded)
Vocabulary / V-groups	V1 energy · change (p. 1) · V2 stored energy (p. 4). evidence + position = language of instruction → blanks in N1/N3.
N-anchor map	N1 Energy Causes Change · N2 Different Forms · N3 Objects Can Store Energy · N4 Recognizing Evidence (+ CHECK YOUR THINKING) · BQ · NOW I THINK
Session 1 · Mon (slides 1–3, 6–16)	BQ + first thinking → sharpener DEMO → changes are clues → V1 cards + write → Reader p. 2 → N1 write + reveal. Notes p. 1.
Session 2 · Tue (slides 2, 17, 19–27)	Slide 18 OPTIONAL. BQ re-entry → forms (p. 3) → N2 write 5 examples → V2 card + write → still battery → position → N3 write + reveal. Notes p. 2.
Session 3 · Fri (slides 2, 28–31, 33 + quiz)	BQ re-entry → N4 draw BEFORE/AFTER → CHECK YOUR THINKING → BQ NOW I THINK → QUIZ (min 12–25). Notes p. 3. No new vocabulary. Quiz by minute 12 (see If short).
What to project	01-ch1-energy-causes-change-slides.pptx — FINAL (45 slides, 16:9) · BQ 2/3/33 · V1 10–12 · V2 20–22 · N1 13–16 · N2 17, 19 · N3 23–27 · N4 28–31 · demo 6–9 · optional 4–5, 18, 32, 34–45

RIGHT PAGE — TEACHER SUPPORT

FIELD	CONTENT
Demo / activity	Electric Pencil Sharpener (live DEMO, slides 6–9). Optional: stretch a rubber band (slide 25, 30 s). There is no salt/balloon demo in Chapter 1 (that is Chapter 4).
Materials	Electric sharpener + unsharpened pencil · optional rubber band · (optional Energy Detectives: flashlight + battery)
Setup	Sharpener on a stable, visible surface · dull pencil ready
Teacher moves	Ask "What changed?" before naming energy · record every change · build model on the board
Ask	"What changed?" "What makes it happen?" "How is the change evidence of energy?"
Listen For	"pencil got shorter/sharper" "it made noise" — evidence, not "I saw the energy"
Misconception / fix	"Only moving objects have energy" → pair moving + stored examples. "Energy is a visible substance" → we see the change, not the energy.
Do-not-overteach	Do not introduce transfer/transformation or kinetic/potential. Keep p. 6 a forward preview. Reader says "evidence, or proof": teach EVIDENCE; accept "proof" once, restate "evidence."
If short on time	Real cuts in the Chapter 1 Pacing Plan (skip slides 4–5, 13, 18; hard stop at minute 24). Friday: quiz by minute 12 (N4 > BQ > CHECK). Never shorten the quiz.
Collect / grade	Notes: not graded · Quiz Fri (9 items · 16 pts · raw + %) · open/closed note = teacher choice · practice = ungraded take-home
Absent / makeup	Chapter 1 Absent-Student Recovery guide
What comes next	Chapter 2 (Wed 10/14) — marble collision demo.

CHAPTER 1 DEMO GUIDE – ELECTRIC PENCIL SHARPENER

LIVE Live demo is preferred. Virtual backup is OPTIONAL / DEFERRED (the previously attempted AI-generated sharpener video failed and must NOT be reused as a dependency).

SECTION	GUIDANCE
Materials	Electric pencil sharpener · unsharpened pencil · optional second (dull) pencil for BEFORE/AFTER side-by-side
Set Up	Sharpener on a stable, visible surface. Have one dull and one sharp pencil ready to compare.
Do This	1) Show the dull pencil. 2) Ask students to predict what will change. 3) Sharpen the pencil. 4) Have students name every change (shorter, sharper, noise).
Ask	"What changed?" "What did you notice with your eyes? with your ears?" "What made the change happen?"
Listen For	"The pencil got shorter and sharper." "The sharpener made noise." Evidence language, not "I saw energy."
Connect	Each change is evidence of energy. Energy = the ability to cause change (Reader p. 1). Build ENERGY → CHANGE → EVIDENCE on the board (students write the checked word in the open last box of their notes N1 model).
Do Not Overteach	Do not claim the tip warms up as student-observed heat (TG "Know the Science 1" – optional, teacher-observed only). Do not require "mechanical energy." ("Electrical energy" is one of the five Reader forms taught in N2 – students may name it, but it is not needed to explain the sharpener.)
If Students Ask	"Where does the energy come from?" → "It comes through the cord/battery – we'll learn more about that later." Keep it a preview.
If Short on Time	Skip the side-by-side comparison · use a single sharpen. Fall back to "flip the light switch" as a backup change.

CHAPTER 1 — SLIDESHOW MAP (FINAL)

DECK 45 slides (16:9). Speaker notes: MODE · TIME · PLAN · ASK · LISTEN FOR · REVEAL · NEXT.

ANCHOR	SLIDES	WHAT HAPPENS ON SCREEN
BQ	2 · 3 · 33	2 = Big Question banner + TURN & TALK · 3 = My first thinking (write) · 33 = BQ · NOW I THINK (return, write)
V1 (energy · change)	10–12	10 = two vocab cards · 11 = notes write · 12 = notes reveal (change · different)
V2 (stored energy)	20–22	20 = one large vocab card · 21 = notes write · 22 = notes reveal (later)
N1 Energy Causes Change	13–16	13 = definition · 14 = seashore + ENERGY → CHANGE → ? · 15 = write · 16 = reveal + full model (copy word into open box)
N2 Energy Occurs in Different Forms	17–19	17 = five forms · 18 = clap check (optional) · 19 = write 5 examples
N3 Objects Can Store Energy	23–27	23 = battery PREDICT · 24 = position · 25 = STORED → RELEASE → CHANGE · 26 = write · 27 = reveal + samples
N4 Recognizing Evidence	28–31	28 = clues · 29 = BEFORE/AFTER draw · 30 = CHECK write · 31 = sample reveal
Phenomenon / demo	4 · 6–9	4–5 optional hook · 6 = observe · 7 = predict · 8 = before/after · 9 = changes are clues
Application / evidence	32	Which change shows energy at work? (choose the change)
End-of-chapter review	34–45	Optional: 6 MC (A/B/C/D); correct letters C·A·D·B·A·C

Reader cues on-slide: V1/N1 pp. 1–2 · N2 p. 3 · V2/N3 pp. 4–5 · N4 pp. 1–5 · BQ p. 1. Timing: Chapter 1 Pacing Plan (S2 = 2, 17, 19–27; 18 optional).

CHAPTER 1 — SUPPORTING RESOURCE INDEX

PRINCIPLE Lean ecosystem: every resource has one distinct job; nothing repeats the Guided Notes.

RESOURCE	CANONICAL FILE	REQUIRED	GRADED	WHEN USED	KEY / ABSENT
Guided Notes (3 pp)	01-ch1-energy-causes-change-guided-notes	REQUIRED	Not graded	Sessions 1–3 (notes write)	key AVAILABLE
Slideshow (45 slides)	01-ch1-energy-causes-change-slides.pptx	REQUIRED	—	Sessions 1–3 + optional review	— (CHECK slides reveal)
Practice / application	01-ch1-energy-causes-change-practice.docx	RECOMMENDED	Not graded (practice)	Take-home after Session 2	key AVAILABLE
Chapter quiz (9 items · 16 pts)	01-ch1-energy-causes-change-quiz.docx	REQUIRED	GRADED (raw + %)	Fri · Session 3 · min 12–25	key + blueprint AVAILABLE
Science Journal	Chapter 1 Science Journal prompts	OPTIONAL/FLEX	Not graded	Daily, secondary role	— (reflective)
Absent / makeup	Chapter 1 Absent-Student Recovery	REQUIRED (support)	Not graded	After absence	self-contained
Energy Detectives	01-ch1-energy-detectives-student.docx	OPTIONAL	Not graded (no points)	After the quiz / later FLEX	look-fors AVAILABLE
Friday FLEX bank	Chapter 1 Friday FLEX	OPTIONAL/FLEX	Not graded	FLEX days after the quiz	—
Study guide + assessment trace	Chapter 1 Study Guide + Assessment Trace	REFERENCE	—	Unit assembly	—

LEAN Practice = ungraded take-home (distinct APPLY task). Science Journal = two daily prompts. Energy Detectives = optional, no points. Pacing: Chapter 1 Pacing Plan.

CHAPTER 2 — TEACHER SPREAD

CHAPTER 2 · MOVING OBJECTS HAVE ENERGY

LEFT PAGE — TEACH IT

FIELD	CONTENT
Big Question	How are energy, change, and movement of objects related? (TG Lesson 3)
Reader pages	Printed 7–12 · PDF 13–18 (motion p.7 · moving objects cause changes p.8 · energy of motion p.9 · people use the energy of motion pp.10–12)
Approximate time	Two sessions: Wed 24 min · Thu 24 min (quiz in hands at minute 12, full 12 minutes). Authority: Chapter 2 Pacing Plan. Friday 10/16 is Chapter 1.
Student resources	Guided Notes (3 pp) · quiz (8 items, 12 pts) · practice (ungraded take-home) · Moving Marbles (optional, after the quiz)
Vocabulary / V-groups	V1: motion (Reader p. 7) · V2: energy of motion (Reader p. 9). evidence + position = Language of Instruction (no Reader page) → concept blanks in N1/N2.
N-anchor map	N1 Moving Objects Can Cause Changes (Reader p.8) · N2 Moving Objects Have Energy (MOVING OBJECT → CHANGE → EVIDENCE + Marble Collision OBSERVE box) · N3 People Use the Energy of Motion (hammer/pendulum/wind table) · CHECK Your Thinking · BQ · NOW I THINK
Session 1 · Wed (slides 1–16)	BQ, marble DEMO, V1, N1, then V2. Notes p. 1 and the V2 line. Stop before N2.
Session 2 · Thu (slides 2, 17–25, 27 + quiz)	30-second marble recall, then N2 draw, N3, CHECK, BQ, then the quiz at minute 12. Slide 26 is optional. Notes pp. 2–3.
What to project	Slideshow. Session 1 = 1–16. Session 2 = 2, 17–25, 27. Optional: 26, 28–37.

RIGHT PAGE — TEACHER SUPPORT

FIELD	CONTENT
Demo / activity	Marble Collision (live demo on Wednesday). Moving Marbles is an optional extension after Thursday's quiz. It is not Friday.
Materials	Two identical marbles · a smooth track/groove (or flat surface with a low guard)
Setup	Place the target marble still on the smooth track; keep a second marble to roll into it.
Teacher moves	Observe → predict → collide → ask "What changed?" → build the model on the board
Ask	"What changed?" "How do we know the moving marble had energy?" "What did the target marble do?"
Listen For	"the target marble moved" "it changed from still to moving" – change language, not "I saw the energy"
Misconception / fix	"Only moving objects have energy" → pair with Chapter 1 stored energy. We do not see the energy. The change is the evidence.
Do-not-overteach	Do not introduce speed/fast-slow (Ch3) or transfer/transformation (Ch4–6). Do not drift into full collision-transfer (Ch5). Keep the demo to change = evidence.
If short on time	Real cuts are in the Chapter 2 Pacing Plan. Quiz stays 12 minutes and starts at minute 12. Shorten only the N3 read-aloud and the CHECK sample. Do not send notes home. Moving Marbles is after the quiz.
Collect / grade	Notes: not graded · Quiz Thu (8 items · 12 pts · raw + %) · open/closed note = teacher choice · practice = ungraded take-home
Absent / makeup	Chapter 2 Absent-Student Recovery guide
What comes next	Chapter 3 – Energy and Speed Are Related (ramp + target preview).

CHAPTER 2 DEMO GUIDE – MARBLE COLLISION

LIVE Live demo is preferred. Purpose: show that a moving object has energy and can cause a change – nothing more (no transfer/transformation depth).

SECTION	GUIDANCE
Materials	Two identical marbles · smooth track/groove or a flat surface with a low guard
Set Up	Target marble resting still on the track. Rolling marble held a short distance away, ready to roll.
Do This	1) Show the still target marble. 2) Predict what will happen. 3) Roll the moving marble into it. 4) Name every change (the target marble moves).
Ask	"What changed?" "What did the target marble do?" "How do we know the moving marble had energy?"
Listen For	"the target marble moved" "it changed from still to moving" – the change is the evidence
Connect	The target marble changed from still to moving. That change is evidence that the moving marble had energy of motion (Reader p. 9). Build MOVING OBJECT → CHANGE → EVIDENCE on the board.
Do Not Overteach	Do not measure distance/speed (Ch3) · do not say the energy "transferred" (Ch4–5) · do not call it kinetic energy.
If Students Ask	"Where did the energy go?" → "That's a great question for a later chapter." Keep it a preview.
If Short on Time	Use slide 7 (evidence) as the whole-demo summary. One roll is the demonstration.

CHAPTER 2 — SLIDESHOW MAP

DECK 37 slides (16:9). Speaker notes: MODE · TIME · PLAN · ASK · LISTEN FOR · REVEAL · NEXT.

ANCHOR	SLIDES	WHAT HAPPENS ON SCREEN
BQ	2 · 3 · 27	2 = Big Question banner + TURN & TALK · 3 = My first thinking (write) · 27 = BQ · NOW I THINK (return, write)
V1 (motion)	8–10	8 = one large vocab card · 9 = notes write · 10 = notes reveal (position)
V2 (energy of motion)	14–16	14 = one large vocab card · 15 = notes write · 16 = notes reveal (moving)
N1 Moving Objects Can Cause Changes	11–13	11 = concept + caption · 12 = write · 13 = reveal (change · outside)
N2 Moving Objects Have Energy	17–20	17 = MOVING OBJECT → CHANGE → EVIDENCE model · 18 = notes write · 19 = OBSERVE before/after draw · 20 = reveal (motion)
N3 People Use the Energy of Motion	21–23	21 = three examples · 22 = notes table write · 23 = reveal (hammer → nail · pendulum → clock gears · wind → blades)
CHECK Your Thinking	24–25	24 = write (how do we know a moving object has energy?) · 25 = sample response
Phenomenon / demo	4–7	4 = observe still target · 5 = predict · 6 = before/after · 7 = change = evidence
Application / evidence	26	Which change shows the energy of motion? (choose the change)
End-of-chapter review	28–37	5 multiple-choice (A/B/C/D) — question state then answer state; letters shuffled B/B/C/D/A

Reader cues on-slide: V1 p. 7 · N1 p. 8 · V2/N2 p. 9 · N3 pp. 10–12 · CHECK pp. 7–12 · BQ p. 7. Timing: Chapter 2 Pacing Plan (Session 1 = slides 1–16; Session 2 = 2, 17–25, 27; 26 and 28–37 optional).

CHAPTER 2 — SUPPORTING RESOURCE INDEX

PRINCIPLE Lean ecosystem: every resource has a distinct job. Keys: Chapter 2 Guided Notes key, quiz key, practice key, and the ungraded Moving Marbles feedback key. Practice asks students to identify the mover, the change, and the evidence.

RESOURCE	CANONICAL FILE	REQUIRED	GRADED	WHEN USED	KEY / ABSENT
Guided Notes (3 pp)	Chapter 2 Guided Notes	REQUIRED	Not graded	Sessions 1–2	key AVAILABLE
Slideshow (37 slides)	Chapter 2 slideshow	REQUIRED	—	Sessions 1–2 + optional review	— (CHECK slides reveal)
Practice / application	Chapter 2 practice page	RECOMMENDED	Not graded	Take-home after Session 1	key AVAILABLE
Chapter quiz (8 items · 12 pts)	Chapter 2 quiz	REQUIRED	GRADED (raw + %)	Thu · in hands at minute 12 · window 12–24	quiz key AVAILABLE
Science Journal	Chapter 2 Science Journal prompts	OPTIONAL/FLEX	Not graded	Daily, secondary role	— (reflective)
Absent / makeup	Chapter 2 Absent-Student Recovery	REQUIRED (support)	Not graded	After absence	self-contained
Moving Marbles	Moving Marbles student page	OPTIONAL	Not graded	After the quiz, not Week 1 Friday	look-fors AVAILABLE
Friday FLEX bank	Chapter 2 Friday FLEX	OPTIONAL/FLEX	Not graded	After the quiz, not Week 1 Friday	—
Study guide + assessment trace	Chapter 2 Study Guide + Assessment Trace	REFERENCE	—	Unit assembly	—

LEAN Practice = ungraded take-home (identify the mover, the change, and the evidence). Moving Marbles is optional because the marble collision is already taught live. Science Journal is the daily reflection only. Pacing: Chapter 2 Pacing Plan.

ANSWER-KEY ARCHITECTURE

How keys are built

PRINCIPLE	REQUIREMENT
Visual mirror	Keys mirror student pages exactly — same layout, page numbers, section codes (BQ / V1 / V2 / N1 / N2).
Fill directly	Answers written onto the mirrored page; no separate answer list.
Accepted/sample responses	Open items: sample response + range of acceptable alternatives (TEACHER_KEY_STANDARD).
Scoring notes	Only when needed: partial credit, point allocation, what NOT to penalize.
Separation	Keys are never mixed into student PDFs; separate teacher file per assessment/quiz/worksheet/lab.

Key index / status

KEY	RESOURCE	STATUS
Ch1 practice key	01-ch1-energy-causes-change-practice-key	AVAILABLE
Ch1 quiz key	01-ch1-energy-causes-change-quiz-key	AVAILABLE
Ch1 guided-notes key	01-ch1-energy-causes-change-guided-notes-key	AVAILABLE (FINAL · 3 pp)
Ch2 guided-notes key	Chapter 2 Guided Notes key	AVAILABLE (candidate · 3 pp)
Ch2 quiz key	Chapter 2 quiz key	AVAILABLE (candidate · 12 pts)
Ch2 practice key	Chapter 2 practice key	AVAILABLE (ungraded)

KEY	RESOURCE	STATUS
Ch2 Moving Marbles key	Moving Marbles key	AVAILABLE (optional, after the quiz)
Ch1 Energy Detectives key	01-ch1-energy-detectives-key	AVAILABLE (OPTIONAL/FLEX)
Ramp It Up 2.0 key	03-ch3-ramp-it-up (ADAPT)	PLANNED / NOT YET GENERATED (update existing)
Pom-Pom Launcher key	net-new build	PLANNED / NOT YET GENERATED
Study guide key	unit1 study guide	AVAILABLE
Review game guide	unit1 review game	AVAILABLE
Unit 1 final key	07-unit-final-assessment-key	AVAILABLE (re-verify after note rebuild)

SPECIAL SECTIONS — STATUS (PHASE 2)

SECTION	STATUS	POINTER
Ramp It Up 2.0 teacher guide	SKELETON · ADAPT — PLANNED	production/labs/03-ch3-ramp-it-up-teacher-spec.md
Pom-Pom Launcher teacher guide	SKELETON · PLANNED (net-new)	net-new (ADAPTED from colleague)
Review plan	SKELETON · points to AVAILABLE assets	production/review/unit-01/ (study guide + game)
Unit 1 assessment administration	SKELETON · locked 25Q/50pt	production/quizzes/07-unit-final-assessment.docx
Answer-key index	RENDERED	see Answer-Key Architecture
FLEX / enrichment / catch-up	SKELETON · points to framework	docs/planning/

SECTION	STATUS	POINTER
		FRIDAY_FLEX_FRAMEWORK.md
Absent / makeup support	Ch1–2 AVAILABLE · Ch3–7 SKELETON	curriculum/chapter-0N/student/recovery/
Media index	SKELETON · Ch1–2 staged · Ch3–7 scripts-only	docs/planning/WHOLE_UNIT_MEDIA_STAGING.md

CHAPTERS 3–7 — SPREAD PLACEHOLDERS

Chapter 2 is already in this playbook. These rows are placeholders for later chapters only.

CHAPTER 3 · ENERGY AND SPEED ARE RELATED

BIG QUESTION	READER PP.	DEMO	NEW CORE VOCABULARY
How are energy and speed related?	13–16	Ramp + Target Preview	speed

CHAPTER 4 · ENERGY TRANSFER

BIG QUESTION	READER PP.	DEMO	NEW CORE VOCABULARY
What evidence shows that energy transfers from place to place?	17–24	Balloon Drum / salt (sound)	energy transfer

CHAPTER 5 · COLLISIONS TRANSFER ENERGY

BIG QUESTION	READER PP.	DEMO	NEW CORE VOCABULARY
How is energy involved in collisions? · What happens when objects collide? How are collisions predictable?	25–30	Toy-Car Collision	collide, collision, sound

CHAPTER 6 · HOW CAN ENERGY TRANSFORMATIONS SOLVE PROBLEMS?

BIG QUESTION	READER PP.	DEMO	NEW CORE VOCABULARY
How do energy transformations help people? · How can I design a device that transforms energy to solve a problem?	31–36	Wind-Up Timer	convert, conversion, energy transformation, engineering design

CHAPTER 7 · SOLVING PROBLEMS AND DESIGNING SOLUTIONS: THOMAS A. EDISON

BIG QUESTION	READER PP.	DEMO	NEW CORE VOCABULARY
How did Thomas Edison use his knowledge of energy transfer and transformation to solve problems? · What have I learned about energy?	37–42	Flashlight	(synthesis — no new Core Vocabulary)
