Energy Causes Change

Chapter 1 · Week 1

BIG QUESTION: Where can we observe evidence of energy causing change?

VOCABULARY + DRAW

energy — Energy is the ability to _____ _____.

change — A change is when something becomes _____.

evidence — A change can be _____ that energy is involved.

MY PICTURES (draw one example for each idea):

energy: a flashlight turning on OR a ball moving

THE MODEL

ENERGY → CHANGE → EVIDENCE

ONE EXAMPLE (before → after)

BEFORE **AFTER**

draw before / after

What changed?

_____

MY OWN EXAMPLE:

_____

Forms of Energy + Stored Energy

Chapter 1 · Week 1

FORMS OF ENERGY (draw or write one example each)

motion: _____

light: _____

sound: _____

heat: _____

electrical energy: _____

STORED ENERGY — LIFT THE FLAP

Can something have energy even when it is not moving?

FOLD HERE (fold down, then lift to read)

YES — stored energy can cause a change later.

Stored energy is energy that has the ability to cause a change at a later time.

Examples:

- battery
- stretched rubber band
- raised object
