# Using Natural Resources for Energy

*Unit 2 Written Assessment · Using Natural Resources for Energy · Student*

**Name:** _____ **Date:** _____ **Score:** _____ / 22

## PART A · MATCHING (8 POINTS)

Write the letter of the meaning next to each term.

| TERM | MEANING (WRITE THE LETTER) |
|---|---|
| 1. renewable resource | _____ |
| 2. nonrenewable resource | _____ |
| 3. fossil fuel | _____ |
| 4. turbine | _____ |
| 5. generator | _____ |
| 6. solar cell | _____ |
| 7. geothermal energy | _____ |
| 8. hydroelectric power | _____ |

**Meanings:**

A. heat that is transferred from inside Earth

B. electricity made from moving water, usually through a dam

C. a machine with blades that spins when steam, wind, or water pushes it

D. a resource that cannot be restored as quickly as it is used

E. a device that converts sunlight to electricity

F. a machine that makes electricity when a turbine spins it

G. a fuel formed from the remains of organisms that lived long ago

H. a resource that can be restored as quickly as it is used

# Parts B–C

**Name:** _____ **Date:** _____

## PART B · MULTIPLE CHOICE (5 POINTS)

Circle the best answer.

**1. Coal is plentiful now but forms over millions of years. Coal is —**

A. renewable B. nonrenewable C. a solar resource D. not a resource

**2. Abundant means a resource is —**

A. always renewable B. plentiful right now C. free D. restored quickly

**3. In a power plant, the generator makes —**

A. steam B. heat C. electricity D. fuel

**4. Which resource needs a windy location to work well?**

A. geothermal B. wind C. coal D. petroleum

**5. Which is a renewable resource?**

A. uranium B. natural gas C. sunlight D. coal

## PART C · ENERGY PATHWAY (3 POINTS)

Number the electricity pathway in order from 1 to 5.

| STEP | ORDER |
|---|---|
| **spin a turbine** | _____ |
| **burn the fuel** | _____ |
| **turn a generator** | _____ |
| **heat water into steam** | _____ |
| **electricity** | _____ |

# Parts D–E

**Name:** _____ **Date:** _____

## PART D · RENEWABLE OR NONRENEWABLE (3 POINTS)

Write R for renewable or N for nonrenewable.

| RESOURCE | R OR N |
|---|---|
| coal | _____ |
| wind | _____ |
| petroleum | _____ |
| sunlight | _____ |
| uranium | _____ |
| flowing water | _____ |

## PART E · SCENARIO (3 POINTS)

**A town gets strong, steady wind most of the year. It has no large river nearby and many cloudy days.**

1. Which resource would be reasonable to investigate for this town? _____
2. Write one fact that supports your choice.

_____

3. Write one limitation they would still need to consider.

_____

## CHECK YOUR THINKING — BONUS (UP TO +2)

**Why does a higher water wheel lift more paperclips? Use the words energy of motion and transfer in your answer.**

_____
