AVAILABLE-LIGHT SOLAR DEVICE — SETUP DIAGRAM

Week 8 · Thursday · Teacher setup guide · TEACHER ONLY (laminate for prep binder)

CHANGE	KEEP THE SAME	MEASURE
available light condition (bright/close · dim/far · shaded)	device · measurement method	observable device output (LED on/off, brightness)

MATERIALS small solar cell + LED · flashlight / desk lamp (indoor backup) · card or box (for the shaded condition) · observation sheet · low-voltage cell only

PER GROUP 1 solar device · 1 lamp/flashlight · 1 shade card · 1 observation sheet

SAFETY Keep the panel at a shallow angle; do NOT look directly at the sun; low-voltage cells only.

RESET / CLEANUP Store solar kits; return lamps; file observation sheets.

PREP NOTE PRIMARY = window/outdoor light; BACKUP = one consistent lamp per group (same lamp, same distance). Test each kit with the lamp the day before.
