WATER WHEEL — SETUP DIAGRAM

Week 7 · Thursday · Teacher setup guide · TEACHER ONLY (laminate for prep binder)

CHANGE	KEEP THE SAME	MEASURE
pour height (15 / 30 / 45 cm)	wheel · blade setup · water volume (500 mL) · pour opening · thread/load system	paperclips lifted (final locked primary response)

MATERIALS paper plate / plastic lid wheel · 8–10 blade cups or popsicle-stick blades · straw / dowel axle · ~50 cm thread · paperclips (load) · pour cup (fixed opening) · 500 mL water source · basin / tray (catch) · ruler (height) · towel

PER GROUP 1 wheel + axle · ~50 cm thread · paperclips · 1 pour cup · 500 mL water · 1 basin · 1 ruler · 1 towel

SAFETY Pour over the basin only; wipe spills immediately; no horseplay near water.

RESET / CLEANUP Dry wheels/blades/basins; dispose water in a sink; respool thread; return paperclips.

PREP NOTE Build wheels Wed; fill pitchers Thu. Lock the pour height with a marked ruler; same 500 mL and same opening every trial.
