Grade 4 Science — ANSWER KEY

Unit 2 Assessment — Using Natural Resources for Energy

Teacher only. 25 questions × 2 points = 50 points.

Part 1: Matching — Answer Key

1. Generator → B. A machine that changes motion into electricity.

2. Nonrenewable Resource → I. A resource that cannot be restored as quickly as it is used.

3. Solar Cell → J. A device that converts sunlight to electricity.

4. Fossil Fuel → D. A fuel formed from the remains of organisms that lived long ago.

5. Turbine → G. A machine with blades that spin when wind, water, or steam pushes them.

6. Geothermal Energy → E. Energy produced by heat that is transferred from inside Earth.

7. Renewable Resource → C. A resource that can be restored more quickly than it is used up.

8. Hydroelectric Power → K. Electricity generated by the energy in moving water, usually through a dam.

Part 2: Multiple Choice — Answer Key

9. D. Nonrenewable, because it forms much more slowly than it is used

10. B. The remains of organisms that lived long ago

11. A. Plants buried in swamps

12. C. Spins a turbine that turns a generator

13. B. Petroleum (crude oil)

14. D. It is a nonrenewable material mined from rock

15. C. Use heat to make steam that spins a turbine and turns a generator

16. A. Moving air (wind)

17. C. Wind keeps coming, but it does not blow all the time in every place

18. B. Moving water flowing through the dam

19. D. Water can be stored behind a dam and released when needed

20. A. It converts sunlight to electricity

21. B. There is no sunlight at night for the solar cell to use

22. C. Heat transferred from inside Earth

23. A. Geothermal works best in places with heat from Earth near the surface, and not every place has that

24. D. Stored energy that can be used again

25. C. Solar power, because the location has strong sunlight most days
