Energy Resource Scenario Challenge

Friday PRACTICE / EXTEND · fictional places · which resource is reasonable to investigate?

Name: _____ **Date:** _____

SCENARIO CARDS — CUT OUT (6)

Sunny Valley A warm town that gets strong sunlight almost every day. Nights are long, and there is no large river nearby.
Windy Coast A seaside town with steady, strong ocean breezes most of the year. The water near shore is calm with no strong currents.
River Gorge A community sits beside a large, fast river that flows all year. The area has steep hills above the river.
Volcano Ridge A town near a mountain with hot rocks and steam vents close to the surface.
Coal Country A region with thick coal seams underground and a long history of mining.
Oil Basin A flat region with large deposits of petroleum below the surface.

STUDENT ANSWER FRAME

Choose ONE resource that would be reasonable to investigate for that place.

Place: _____

Resource we would investigate: _____

One fact that supports it: _____

One limitation to still consider: _____

TEACHER KEY — REASONABLE ANSWERS (ACCEPT ANY DEFENSIBLE CHOICE)

Sunny Valley → solar

Supporting fact: Strong sunlight almost every day

Limitation: Long nights / clouds reduce output

Windy Coast → wind

Supporting fact: Steady, strong breezes

Limitation: Wind can be calm some days

River Gorge → hydroelectric

Supporting fact: Large, steady river

Limitation: Dam could flood land / block fish

Volcano Ridge → geothermal

Supporting fact: Hot rocks near surface

Limitation: Only works in that special location

Coal Country → coal

Supporting fact: Thick coal seams

Limitation: Burning releases substances into air

Oil Basin → petroleum

Supporting fact: Large oil deposits

Limitation: Spills can harm land/water

Students may choose a different resource as long as they give one supporting fact and one limitation. This is about reasoning, not one right answer.
