Available Light & a Solar Device

Mini-investigation · Wk 8 Thu · how does available light affect a solar device?

Name: _____ Date: _____

Question: How does the amount of available light change what our solar device does?

Fair Test: Keep the SAME solar device and the SAME way of observing. We change ONLY the light.

PREDICTION

If we give the solar cell more light, then _____.

If we give the solar cell less light (shade it), then _____.

OBSERVE

Condition	What I observe	Change I see (evidence)
Bright / close light		
Dim / far light		
Shaded		

EXPLAIN

The change I saw is my evidence. The device worked best when _____.

This tells me solar devices depend on the light that is available.
