Interactive Science Notebook

Chapter 7 — Solving Problems and Designing Solutions: Thomas A. Edison

Unit close • Week 9 • 3 inserts

Name: _____ Date: _____

INSERT 1 — ENGINEERING IS A CYCLE

Cut out and glue this cycle into your notebook. Then add your own examples.

PROBLEM

DESIGN

TEST

EVIDENCE

IMPROVE

One example from Edison's work:

One example from my own tabletop device:

INSERT 2 — ENERGY UNIT CONCEPT MAP

Center: ENERGY. Branches: causes change · motion · speed · transfer · collisions · transformation · engineering.

Add ONE example or piece of evidence under each branch.

Branch	My example / evidence
causes change	
motion	
speed	
transfer	
collisions	
transformation	
engineering	

INSERT 3 — UNIT REFLECTION

Finish these sentences with your own ideas.

Something I can explain now:

A lab that gave strong evidence:

One engineering change that improved a design:

One question I still have:

Provenance: CUSTOM (engineering cycle + unit concept map + reflection scaffolds). Content: SOURCE-aligned (Reader Ch.7 pp.37-42; TG pp.94-98).
