UNIT FINAL ASSESSMENT — SCORING GUIDE

> Grade 4 · 26 items · 50 points · 30–45 min · split across Wednesday/Thursday if needed.

Total points & section weights

Section	Items	Points	Weight
Core concepts	1,2,5,6,12,13,14,17,21,25	13	26%
Data / diagram	3,4,8,9,10,15,18	15	30%
Application / evidence	7,11,16,19,22	13	26%
Engineering / synthesis	20,23,24,26	9	18%
Total	26	**50**	100%

> Weights differ slightly from the blueprint's raw item counts because diagrams/short answers carry more points, matching the official philosophy (written explanations weighted higher than MC).

Written-response rubric (items 3, 23, 26)

- 4-point model (item 3): Above/Average/Adequate/Inadequate (see key).
- 3-point CER (item 23) and engineering (item 26) rubrics (see key).
- Full detail in `07-unit-final-assessment-key.md`.

Correction policy

- Corrections use `curriculum/chapter-07/student/recovery/07-final-assessment-corrections-recovery.md` (MISSED ITEM → ORIGINAL THINKING → CORRECT IDEA → EVIDENCE → NEW EXAMPLE).
- Corrections are concept repair, not busywork; no arbitrary grade cutoffs imposed beyond project policy.

Missing-assessment / recovery policy

- Absent students take the final untimed (or a teacher-selected subset: items 1–13 + one written explanation).
- Makeup follows `curriculum/chapter-07/student/recovery/07-ch7-absent-student-recovery.md`.
- Label makeup work "completed independently / makeup."
