Energy's Big Questions

Unit Synthesis — aligned to AP UR.1

Name: _____ Date: _____

Answer in complete sentences. Underline any Core Vocabulary you use. Use EVIDENCE, not proof.

1. What is energy?

2. How do observable changes provide evidence that energy is involved?

3. How does a moving object show it has energy?

4. How does speed affect energy of motion for the SAME object?

5. How can energy transfer from place to place?

6. What happens to energy in a collision?

7. What is transformation?

8. When can BOTH transfer and transformation occur?

9. How do engineers use testing and evidence?

10. What did Edison's work show about engineering persistence?
